

SANDESH YADAV

Java Backend Developer

Indore, India | +91-7697807800 | sandesh19yadav@gmail.com

LinkedIn: linkedin.com/in/sandesh-yadav-7571aa215 | GitHub: github.com/sandesh1925

PROFESSIONAL SUMMARY

Results-oriented **Java Backend Developer** with **2+ years of experience** in designing, developing, and deploying scalable **Spring Boot microservices** for enterprise and cloud-native applications. Strong expertise in RESTful API design, clean architecture, and backend performance optimization.

Hands-on experience in **enterprise integrations** including **Microsoft Graph API** and **Google Workspace APIs**, enabling automation of organizational workflows such as Microsoft Teams access, calendar scheduling, and identity-driven operations.

Strong background in **Identity & Access Management (IAM)**, implementing **OAuth 2.0**, **Azure Active Directory (Entra ID)**, **JWT**, and **Role-Based Access Control (RBAC)** to secure sensitive HR and Finance workflows.

Experienced in **microservices architecture** using Spring Cloud Gateway and Resilience4j to ensure fault tolerance, high availability, and reliability in insurance and enterprise systems.

Hands-on expertise in **Redis caching** (Look-Aside, Session, Pub/Sub), SQL query optimization, and resolving JPA N+1 issues to improve system performance.

Actively involved in building **AI-powered backend systems** using **Google Gemini API**, vector databases (Pinecone), semantic search, and agentic workflows.

Comfortable working in **Dockerized environments**, basic Kubernetes setups, Linux systems, and CI/CD pipelines using Jenkins and Git, following Agile development practices.

TECHNICAL SKILLS

Languages & Frameworks: Java 17, Spring Boot, Microservices, REST APIs, Hibernate/JPA

Cloud & Integrations: Microsoft Graph API, Azure AD (Entra ID), OAuth 2.0, Google Workspace APIs

Infrastructure & DevOps: Docker, Kubernetes (Basic), Jenkins CI/CD, Git, Linux (RHEL/Ubuntu)

Data & Performance: Redis (Caching/PubSub), SQL Optimization, PostgreSQL, MySQL

AI Systems: Google Gemini API, Pinecone, Semantic Search, Agentic Workflows

PROFESSIONAL EXPERIENCE

Java Developer (Backend & AI Systems)

56N Software Pvt. Ltd., Ahmedabad | May 2025 – Present

- Architected secure Microsoft Graph API integrations to access Teams channels and org hierarchies.
- Implemented OAuth 2.0 authentication using Azure Entra ID for HR/Finance workflows.
- Built fault-tolerant sync engines integrating Gemini AI with ERP systems using Redis, reducing DB load by 40%.
- Developed intelligent Google Calendar automation with conflict resolution.
- Optimized SQL queries and resolved JPA N+1 issues, improving API response times.

Java Software Engineer

MindProve Technologies Pvt. Ltd., Indore | March 2024 – April 2025

- Developed Spring Boot microservices for insurance systems using Spring Cloud Gateway.
- Integrated Resilience4j circuit breakers ensuring 99.9% availability.
- Practiced TDD using JUnit and Mockito with CI/CD enforcement.
- Managed ACID-compliant transactional flows for Pregnancy & Accident claims.

Software Developer Intern

Precious Infosystem Pvt. Ltd., Indore | Jan 2024 – Mar 2024

- Developed CRUD-based REST APIs and supported Linux-based deployments.

KEY PROJECTS

Intelligent HR & Finance Agent (Agentic AI)

Tech Stack: Java, Spring Boot, Microsoft Graph, Redis, Docker

- Built a multi-agent orchestration system automating HR and Finance tickets, reducing manual workload by 60%.
- Implemented Redis look-aside caching reducing latency by ~200ms.
- Synced Microsoft Teams memberships via background workers.

Distributed Library Management System

Tech Stack: Spring Boot, Kafka, MySQL, Docker

- Implemented event-driven notification services using Kafka.
- Dockerized User, Book, and Borrow microservices.

Guardian Life Insurance – Claims Module

Tech Stack: Spring Boot, JPA, MySQL

- Built backend validation engines reducing manual claim processing by 80%.
- Designed optimized APIs aggregating claim data.

Food & Money Charity Platform

Tech Stack: Java, JSP, MySQL, HTML/CSS

- Implemented RBAC-based security and admin/user dashboards.
- Engineered secure donor-recipient transaction workflows.

EDUCATION

Master of Computer Applications (MCA) – DAVV, Indore | 2021 – 2023

Bachelor of Computer Applications (BCA) – DAVV, Indore | 2018 – 2021
